

## 1998 Ranger EV

### Selected Ranger EV Ordering Information

- Call 1-800-ALT-FUEL for the EV Ford dealer in your area
  - Contact that dealership:
    - Determine options
    - Dealer orders vehicle
    - Service and warranty\* handled by dealer
  - If there is not a Ford EV dealer near you, complete the Indication of Order Form or ask your local Ford dealer to inquire about EV Certification
- \* See your dealer for copies of the limited warranties

### 1998 Ranger EV

Code	Model	Remarks/Restrictions
R10	Regular Cab 4x2	112" wheelbase, 6' box
	<b>Powertrain</b>	
997/444	3-phase AC electric motor/single speed transaxle	
	<b>Other Options</b>	
517	Spare tire and jack	
572	Air conditioning	
63C	Battery heater	

A separate piece of equipment is required to charge the electric vehicle drive batteries. Called the Power Control Station, it provides the link between the stationary electric power source and your electric vehicle. The Power Control Station regulates power flow to the on-board vehicle charger and must be wired directly to a 240 volt, 30 amp electric service source.

The Power Control Station and its installation are not included in the Ranger EV purchase price and must be individually contracted for by the vehicle customer. For a list of approved distributors for this equipment, please contact your EV approved dealer or call 1-800-ALT-FUEL.
